Sofiya Semenova

sofiya@sofiya.io   https://sofiya.io   http://github.com/ssemenova   https://www.linkedin.com/in/novasofiya/

EDUCATION

Ph.D. Student, Computer Science   University at Buffalo, Buffalo, NY   08/18 - current

B.S. (High Honors)   Brandeis University, Waltham, MA   08/13 - 05/17
Major: Computer Science, Minor: Physics
Thesis: *"Clouds That Think: Applications of Machine Learning Techniques for Elastic Databases"*

WORK EXPERIENCE

Google   Seattle, WA
Software Engineering Intern   06/19 - 08/19
– Developed and shipped a logistic regression model in Chrome to predictively prefetch the page(s)
  that a user will likely navigate to next, to decrease user-perceived latency on mobile devices
– C++, Python, Scikit-Learn, TensorFlow

University at Buffalo   Buffalo, NY
Graduate Research Assistant   08/19 - current
– Balancing performance goals and resource constraints for real-time, vision-based localization
  applications on mobile devices by using edge servers for prefetching localization and map data
– C++, Java (Android)

Graduate Teaching Assistant   08/18 - 05/19
– Data Structures - Fall 2018
– Systems Programming - Spring 2019

edX   Cambridge, MA
Software Engineer   06/17 - 08/18
– Implemented an API for AWS SNS notifications for processing video ingest tasks
– Improved VEDA performance via parallelization of ingest tasks
– Developed an API that tracks and displays users' course completion data to increase user
  first-week engagement, and ran A/B tests on proposed features to use the data
– Linux, AWS (RDS, ec2, SNS), Terraform, Docker, Python, SQL, MongoDB, Django, Javascript

Software Engineering Intern   06/16 - 08/16
– Improved accessibility of the edX platform for screen-reader and keyboard-only users,
  mainly through creating a new, entirely keyboard-accessible essay-writing module
– Python, Django, Javascript

Brandeis University   Waltham, MA
MakerLab Web Developer Team Lead   04/15 - 05/17
– Created a relational schema design, a user interface to access, search, and modify data,
  and a data visualization dashboard for the Brandeis Western Jihadism Project

Undergraduate Teaching Assistant   09/14 - 12/14
– Introduction to Computer Science (required introductory Java course)

SELECTED PROJECTS   *https://sofiya.io/projects*

NashDB, an application to automatically fragment, replicate, and provision elastic, cloud databases. *Java*

WiSDoM, a demo for WiSeDB, a machine learning approach for cost/performance management for cloud databases. *Java*

Edgar Allan Poetry, a poetry generator using RNNs and Markov chains. Won Best Artificial Intelligence Hack at HampHack. *Python*

LEADERSHIP

Computer Science Undergraduate Department Representative   09/15 - 05/16
President of Brandeis' Computer Science Club and Lead Hackathon Organizer   09/14 - 05/16
